

All Mariners are advised that the Met Office has issued a red weather warning for the Clyde Estuary and Loch Fyne areas of Clydeport's SHA.

All Masters/Skippers/Owners and vessel operators with vessels located within the Clydeport area are requested to ensure that, where safe to do so, their vessels are properly secured and made safe ahead of Storm Eowyn. Once the storm has passed and it is safe to do so, vessels should be checked to ensure they remain secure.

What should I do?

- 5 tips for staying safe in strong wind >
- Travelling in storms, rain and strong wind >
- Driving safely in winter weather >

Further detail

Southwesterly then westerly winds will rapidly increase from west to east Friday mid-morning onwards into the afternoon, with peak gusts of 80-90 mph fairly widely and perhaps up to 100 mph along exposed western coasts. This brings the risk of significant disruption to transport and power supplies as well as dangerous conditions outdoors. Winds will gradually ease through Friday evening.

What Should I Do?

Keep yourself and others safe; avoid travelling by road during potentially dangerous conditions. It is not safe to drive in these conditions.

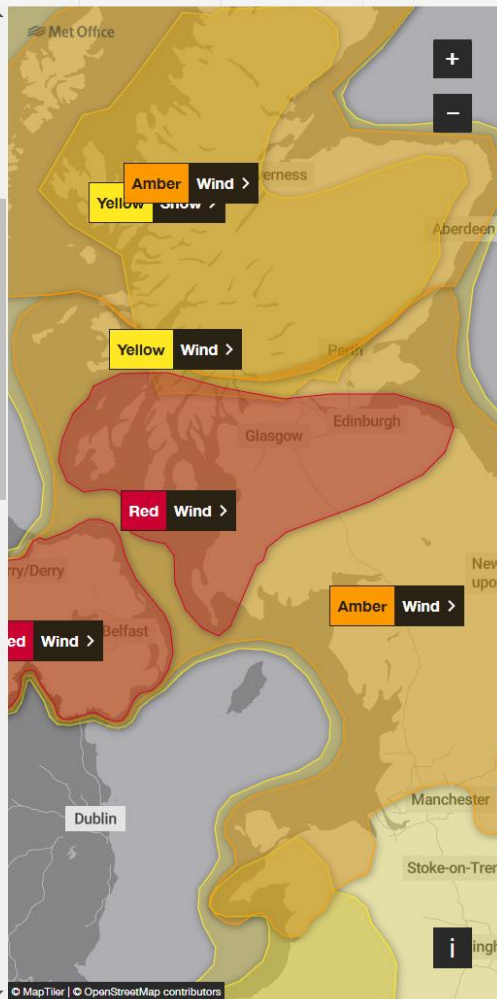

Don't risk injury to others or damage to your property. If you can do so safely, check for loose items outside your home and secure them. Items include; bins, garden furniture, trampolines, tents, sheds, and fences.

Being outside in high winds makes you vulnerable to injury. Stay indoors if you can.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you live or work on the coast, beware of large waves, even from the shore large breaking waves can sweep you off your feet and out to sea. In an emergency, call 999 and ask for the Coastguard.
